

USER GUIDE

Getting Started with Storvv

A simple guide to running your store day to day, no tech knowledge needed.

For store owners, managers, and staff

What's Inside

- 1 What is Storvv?
- 2 Logging in
- 3 Setting up your first store
- 4 Adding your products
- 5 Making a sale
- 6 Handling a return
- 7 Sending receipts to customers
- 8 Adding your team
- 9 Checking how your store is doing
- 10 Getting help

1 What is Storvv?

Storvv is an app that helps you run your shop. It keeps track of everything you have for sale, records every sale you make, and shows you how your business is doing, all in one place.

You can use it on your phone, tablet, or computer, and everything stays in sync automatically.

IN SHORT

Add your products once. Sell them through the app. Storvv keeps the numbers straight for you.

2 Logging In

1 Open the Storvv app

On your phone or by visiting app.storvv.com on a computer.

2 Enter your email and password

Use the details you signed up with, or the ones your shop owner gave you.

3 First time logging in as staff?

You'll be asked to set your own password before you can continue. This keeps your account secure.

3 Setting Up Your First Store

The first time you log in as an owner, Storvv will walk you through a short setup.

1 Choose your currency and country

This makes sure prices and dates look right for you.

2 Tell us about your shop

Add your shop's name, address, and contact details.

3 You're in

Your dashboard is ready. You can always add more shops later if your business grows.

4 Adding Your Products

In Storvv, products are organized into **categories** (like "Shoes" or "Phones"), and each category holds the individual items you sell.

[Inventory](#) → [Create Category](#)

Step by step

1 Create a category

Give it a name and decide what details you want to track (price, size, color, whatever fits your shop).

2 Choose how you track stock

If every item has its own serial number (like phones), turn on serial tracking. If you just sell by quantity (like socks), leave it off.

3 Add your items

Open the category and add products one at a time, or add many at once if you're using serial numbers.

GOOD TO KNOW

Once an item is sold, you can't edit or delete it, so your sales history always stays accurate.

5 Making a Sale

There are two ways to make a sale in Storvv, a full receipt or a quick sale.

Full receipt (best for detailed sales)

[Receipts](#) → [New Receipt](#)

1 Pick the category

Choose which type of product you're selling.

2 Choose the items

Select what the customer is buying and how many.

3 Add the details

Enter the customer's name (optional), how they're paying, and any notes.

4 Save it

Your receipt is ready to view, print, email, or send on WhatsApp.

Quick Sale (best for fast, simple sales)

Tap **Quick Sale** for a faster checkout screen. You can scan a barcode with your camera or add items manually, great for a busy counter.

TIP

A customer can pay with more than one method (say, part cash, part card) using split payments on either screen.

6 Handling a Return

Made a mistake, or a customer wants to bring something back? Returns are always linked to the original sale, so your records stay clean.

1 Find the receipt

Go to Receipts and search for the original sale.

2 Tap Return

Choose which items are being returned and why.

3 Confirm

The items go back into your stock automatically, and the receipt is marked as refunded.

7 Sending Receipts to Customers

After a sale, you can send the receipt straight to your customer:

- **Email:** sent directly if you've added the customer's email
- **WhatsApp:** sent through the app, or shared using your phone's share menu
- **Shareable link:** a web link the customer can open anytime to view their receipt

NOTE

On the free plan, WhatsApp sends are limited each month. Paid plans send as many as you need.

8 Adding Your Team

As your shop grows, you can invite staff to help out, without giving them full access to everything.

[Departments](#) → [Add Staff](#)

1 Create a department

Group your team by role or area, like "Sales" or "Warehouse".

2 Add a team member

Enter their name and email. Storvv creates their account and gives them a temporary password.

3 They set their own password

The first time they log in, they'll be asked to choose a new password.

ROLES, EXPLAINED SIMPLY

MANAGER

can edit sales and inventory.

STAFF

can make sales but can't delete or edit past receipts. You can also give any staff member special permission to manage inventory.

9 Checking How Your Store Is Doing

On plans with analytics, your dashboard shows how your shop is performing.

Analytics

- How much you've sold today, this week, or this month
- Your average sale amount
- Products running low on stock
- Any refunds you've processed

You can also download a report as a PDF or spreadsheet whenever you need one.

10 Getting Help

Stuck on something? Storvv has a built-in Help Center with answers for every part of the app.

Help

You can search by topic, like inventory, sales, or settings, right from inside the app. No need to leave Storvv to find an answer.

Thanks for using Storvv. We built it to make running your shop simpler, one sale at a time.
